BIODATA BASEL · COMMUNITY MEETUP

BioData *Basel*

BioData Basel is a community for students, researchers, and professionals working across bioinformatics, data science, and genomics in and around Basel. Each meetup pairs a technical talk with real discussion and good company, bridging academia and industry. This edition: ovarian cancer chemoresistance, and how the tumor's own immune cells can help overcome it.

01 · WHEN

Thursday, Nov 12, 2026

17:30-19:30

02 · WHERE

DBM, ZLF Basel

Seminar Room, 2nd floor
Hebelstrasse 20

03 · WHO

Open to all

Academia & industry

THIS EDITION'S TALK

"Chemotherapy primes tumor-associated macrophages to enable caspase-8 dependent apoptosis triggered by birinapant in ovarian cancer cells"

Ovarian cancer usually returns resistant to chemotherapy. How tumor macrophages and a SMAC mimetic can re-trigger cell death, and how ex vivo drug testing on patient tissue helps predict who benefits.

OPENING · 17:30

Hendrik Mallin

Olink. Case studies, plus opportunities at Olink / Thermo Fisher Scientific.

MAIN TALK · 18:00

Ricardo Coelho

PhD, Ovarian Cancer Research Group, Department of Biomedicine, University Hospital Basel

Birinapant, tumor macrophages and mesothelin as predictors of response.

NETWORKING · 18:30-19:30

Apero

Sponsored by Olink, part of Thermo Fisher Scientific
